

# 4 to 25% Advance On This Oil Stock June 8

To investors—This Company now controls over 30,000 thirty thousand acres of lands and leases in the oil and gas belt. These properties have been carefully selected and are well blocked into many different properties, reaching into twelve different oil counties. We have actual work started on twenty-two new wells—six to eight of which should be completed during the next week, bringing several to the deep sand.

This Company may have over two hundred million dollars of oil in these different properties and is determined to put into operation the largest of forty to fifty drills and seven I am going until the Company's production reaches twenty thousand barrels per day.

It controls one great lease of nearly four thousand acres situated on the rich Healdton oil pool on a reported greater anticline than Healdton. The Healdton field covers less acreage and is now estimated to be worth nearly a quarter of a billion dollars.

Also this Company has just recently secured a lease of nearly five thousand acres in Stephens county, Oklahoma, several hundred acres of which are in line between a rich pool near Duncan and another pool north of Ringling that is developing enormous gas wells at a greater depth. Should be big oil news today.

This Company wishes to put 15 to 20 drills on these great southern oil fields as soon as possible and will report greater anticline than Healdton. The Healdton field covers less acreage and is now estimated to be worth nearly a quarter of a billion dollars.

According to recent surveys a part of our Big Lease—about fifteen quarter sections near the center of Pawnee county—is located in the heart of the great Jennings pool, which some oil men believe may be nearly a second Cushing field.

Several new wells will soon be started on this valuable acreage with chances good for 200 to 2,000 barrel well of high grade oil at each location.

At the hour this notice is written the drills are in the cap rock of production in six different wells of The Uncle Sam Oil Company.

By Thursday, June 8, six to eight new wells in different districts should be completed. Some of them are certain to be rich producers and will justify an advance on the stock from 4 to 25 percent, which will immediately follow on the advertised price as stated herein.

This Company is offering the real estate investor a real opportunity. It is in fact sufficient strength to continue a big drilling campaign until rich results are secured. It now has nearly one hundred and fifty (150) producing oil and gas wells and room for about two thousand more. It has three refineries over 150 miles of pipe line. The Company owns its own tank cars and oil marketing stations. It is the Pioneer & dependent in control of a market directly to the people. With just a little good luck in our drilling operations the combined properties of this Company should reach a value to the stockholders of over forty million dollars.

The completion of this campaign will mean that all is completed total amount Forty Thousand Dollars per month and now be devoted to new wells and drilling. In a year time by starting the drills, the position is almost sure to be increased five times and may increase fifteen times and raise a tremendous advance on this stock.

The oil fields of the middle west have largely been strayed. The only two powerful independent oil fields left are still. Millions have been made in oil and millions will be made in oil. The Uncle Sam Oil Company is the great Peoples' Company, now owned by nearly twenty thousand stockholders representing states and congressional districts in the United States. It has bought its way through acquisition by properties. It results the only oil and gas company in black and white and through the independent Press takes the parts of its confidence.

It is determined to raise \$1,000,000 worth of stock in the next few months and 1,000 acres of oil leases in the larger States. A few large areas are now available for drilling, and will soon be made up new wells in a manner that will be spaced off on the way.

We are going to do all we can to help the Red Rock industry, and we are at work with the best and the middle income Texas families.

The stockholders are good men and girls in our Ranch areas, and between family and the center urban, nonoil landholders.

The Company has possessed a very large production in the most important fields and areas of the country. The truth is, The Uncle Sam Oil Company is doing things all out to the best advantage of the oil fields, and of oil companies, which are known to the public. This safety will be maintained. Every major producer in the business is anxious and eager to meet the oil and gas market growing. The value of crude oil has been set by history.

You will see a solidified stockholders and 100% interest in the future. Further purchases will be seen in view of same first class securities as send four cents dividends and better will be planned, according to the plan and success of the company. The respective area is for 100,000,000 and can be used for the same number and nothing before mentioned.

As part of the consideration the Company reserves the right to write off against the stockholders the amount of capital stock held by the company.

Franchise of the stockholders is now reentered on the balance sheet provided the stockholders and

the value of stock held by the stockholders after seven years.

You will find another investment in the United States that will give you greater than ever return. This Company can now compete in drilling test wells that are now being drilled at less than one million dollars. The present stockholders have no investment but a half million dollars, or a sixth price about four times.

The Company's different leases carry a value of 100,000,000 to 150,000,000 to the stockholders.
